Viruses in Food and Water: Risks, Surveillance and Control (Woodhead Publishing Series in Food Science, Technology and Nutrition)

Viruses in Food and Water: Risks, Surveillance and Control (Woodhead Publishing Series in Food Science, Technology and Nutrition)

Viruses can be highly infectious and are capable of causing widespread disease outbreaks. The significance of viral pathogens in food and waterborne illness is increasingly being recognised and viruses transferred by these routes are important areas of research. Viruses in food and water reviews the risks, surveillance and control of food and waterborne viral disease.

Part one provides an introduction to food and environmental virology. Part two goes on to explore methods of detection, surveillance and risk assessment of viruses in food and water; it includes chapters on molecular detection of viruses in foods and food processing environments, quality control in the analytical laboratory, and quantitative risk assessment for food and waterborne viruses. Part three focuses on virus transmission routes and control of food and water contamination. It contains chapters on fresh produce, shellfish and viral presence, and control methods in waste water and sewage. Finally, part four highlights particular pathogens including norovirus, hepatitis A and emerging zoonotic viruses.

Viruses in food and water is a standard reference book for microbiologists in academia, analytical labs and the food and water treatment industries, as well as environmental health professionals and researchers working on foodborne viruses.

- Explores methods of detection, surveillance and risk assessment of viruses in food and water
- Considers virus transmission routes and control of food and water contamination
- Highlights advances in the understanding of specific pathogens, including norovirus, hepatitis A and rotaviruses and the advances in vaccine development

From reader reviews:

Brenda Gregg:

In this 21st centuries, people become competitive in each way. By being competitive currently, people have do something to make these people survives, being in the middle of typically the crowded place and notice simply by surrounding. One thing that at times many people have underestimated the item for a while is reading. That's why, by reading a guide your ability to survive enhance then having chance to endure than other is high. In your case who want to start reading a book, we give you this particular Viruses in Food and Water: Risks, Surveillance and Control (Woodhead Publishing Series in Food Science, Technology and Nutrition) book as beginner and daily reading e-book. Why, because this book is more than just a book.

Edward Lott:

Now a day individuals who Living in the era exactly where everything reachable by connect with the internet and the resources in it can be true or not require people to be aware of each details they get. How people have to be smart in getting any information nowadays? Of course the answer then is reading a book. Reading through a book can help individuals out of this uncertainty Information particularly this Viruses in Food and Water: Risks, Surveillance and Control (Woodhead Publishing Series in Food Science, Technology and Nutrition) book because this book offers you rich info and knowledge. Of course the data in this book hundred per cent guarantees there is no doubt in it you probably know this.

Walter Pressley:

This Viruses in Food and Water: Risks, Surveillance and Control (Woodhead Publishing Series in Food Science, Technology and Nutrition) tend to be reliable for you who want to certainly be a successful person, why. The main reason of this Viruses in Food and Water: Risks, Surveillance and Control (Woodhead Publishing Series in Food Science, Technology and Nutrition) can be one of several great books you must have is definitely giving you more than just simple reading through food but feed you actually with information that might be will shock your previous knowledge. This book is usually handy, you can bring it all over the place and whenever your conditions throughout the e-book and printed people. Beside that this Viruses in Food and Water: Risks, Surveillance and Control (Woodhead Publishing Series in Food Science, Technology and Nutrition) forcing you to have an enormous of experience such as rich vocabulary, giving you trial run of critical thinking that we know it useful in your day action. So , let's have it and revel in reading.

Zachary Connors:

Spent a free time and energy to be fun activity to perform! A lot of people spent their spare time with their family, or their particular friends.
