God and the Evolving Universe James Redfield, Michael J. Murphy, Sylvia Timbers

In a world racked by violence and conflict, James Redfield and Michael Murphy—leading cocreators of today's spiritual boom—present a message of hope and a vision for the future.

It is no accident, they argue, that the twentieth and early twenty-first centuries have witnessed a revolution in new human capacities. Daily we hear and read about supernormal athletic feats; clairvoyant perception; lives transformed by meditative practices; healing through prayer—and we ourselves experience these things.

The authors contend that thousands of years of human striving have delivered us to this very moment, in which each act of self-development is creating a new stage in planetary evolution—and the emergence of a human species possessed of vastly expanded potential.
