Classification of Lipschitz Mappings (Chapman & Hall/CRC Pure and Applied Mathematics)

Lukasz Piasecki

Classification of Lipschitz Mappings (Chapman & Hall/CRC Pure and Applied Mathematics)

Lukasz Piasecki

Classification of Lipschitz Mappings (Chapman & Hall/CRC Pure and Applied Mathematics) Lukasz Piasecki

Classification of Lipschitz Mappings presents a systematic, self-contained treatment of a new classification of Lipschitz mappings and its application in many topics of metric fixed point theory. Suitable for readers interested in metric fixed point theory, differential equations, and dynamical systems, the book only requires a basic background in functional analysis and topology.

The author focuses on a more precise classification of Lipschitzian mappings. The mean Lipschitz condition introduced by Goebel, Japón Pineda, and Sims is relatively easy to check and turns out to satisfy several principles:

- Regulating the possible growth of the sequence of Lipschitz constants $k(T^n)$
- Ensuring good estimates for $k_0(T)$ and $k_\infty(T)$
- Providing some new results in metric fixed point theory

From reader reviews:

Bill Boyd:

Why don't make it to become your habit? Right now, try to ready your time to do the important behave, like looking for your favorite reserve and reading a guide. Beside you can solve your condition; you can add your knowledge by the book entitled Classification of Lipschitz Mappings (Chapman & Hall/CRC Pure and Applied Mathematics). Try to the actual book Classification of Lipschitz Mappings (Chapman & Hall/CRC Pure and Applied Mathematics) as your friend. It means that it can to get your friend when you truly feel alone and beside those of course make you smarter than ever before. Yeah, it is very fortuned to suit your needs. The book makes you more confidence because you can know almost everything by the book. So , we should make new experience and knowledge with this book.

Gary Lopez:

With other case, little people like to read book Classification of Lipschitz Mappings (Chapman & Hall/CRC Pure and Applied Mathematics). You can choose the best book if you want reading a book. Provided that we know about how is important some sort of book Classification of Lipschitz Mappings (Chapman & Hall/CRC Pure and Applied Mathematics). You can add know-how and of course you can around the world by a book. Absolutely right, simply because from book you can understand everything! From your country until foreign or abroad you may be known. About simple point until wonderful thing you could know that. In this era, you can open a book or searching by internet system. It is called e-book. You should use it when you feel bored to go to the library. Let's study.

Hermelinda Anthony:

Hey guys, do you would like to finds a new book to read? May be the book with the title Classification of Lipschitz Mappings (Chapman & Hall/CRC Pure and Applied Mathematics) suitable to you? Typically the book was written by popular writer in this era. Often the book untitled Classification of Lipschitz Mappings (Chapman & Hall/CRC Pure and Applied Mathematics)is a single of several books which everyone read now. This specific book was inspired a lot of people in the world. When you read this book you will enter the new dimension that you ever know prior to. The author explained their idea in the simple way, consequently all of people can easily to understand the core of this e-book. This book will give you a large amount of information about this world now. To help you see the represented of the world in this book.

Mary Fox:

Don't be worry when you are afraid that this book can filled the space in your house, you may have it in e-book method, more simple and reachable. This specific Classification of Lipschitz Mappings (Chapman & Hall/CRC Pure and Applied Mathematics) can give you a lot of buddies because by you investigating this one book you have thing that they don't and make anyone more like an interesting person. This kind of book can be one of a step for you to get success. This e-book offer you information that probably your friend

doesn't understand, by knowing more than some other make you to be great persons. So , why hesitate? We should have Classification of Lipschitz Mappings (Chapman & Hall/CRC Pure and Applied Mathematics).
