Computer Vision Using Local Binary Patterns (Computational Imaging and Vision)

Matti Pietikäinen, Abdenour Hadid, Guoying Zhao, Timo Ahonen

Computer Vision Using Local Binary Patterns (Computational Imaging and Vision) Matti Pietikäinen, Abdenour Hadid, Guoying Zhao, Timo Ahonen

The recent emergence of Local Binary Patterns (LBP) has led to significant progress in applying texture methods to various computer vision problems and applications. The focus of this research has broadened from 2D textures to 3D textures and spatiotemporal (dynamic) textures. Also, where texture was once utilized for applications such as remote sensing, industrial inspection and biomedical image analysis, the introduction of LBP-based approaches have provided outstanding results in problems relating to face and activity analysis, with future scope for face and facial expression recognition, biometrics, visual surveillance and video analysis.

Computer Vision Using Local Binary Patterns provides a detailed description of the LBP methods and their variants both in spatial and spatiotemporal domains. This comprehensive reference also provides an excellent overview as to how texture methods can be utilized for solving different kinds of computer vision and image analysis problems. Source codes of the basic LBP algorithms, demonstrations, some databases and a comprehensive LBP bibliography can be found from an accompanying web site.

Topics include: local binary patterns and their variants in spatial and spatiotemporal domains, texture classification and segmentation, description of interest regions, applications in image retrieval and 3D recognition - Recognition and segmentation of dynamic textures, background subtraction, recognition of actions, face analysis using still images and image sequences, visual speech recognition and LBP in various applications.

Written by pioneers of LBP, this book is an essential resource for researchers, professional engineers and graduate students in computer vision, image analysis and pattern recognition. The book will also be of interest to all those who work with specific applications of machine vision.

From reader reviews:

William Gannaway:

This Computer Vision Using Local Binary Patterns (Computational Imaging and Vision) book is not really ordinary book, you have it then the world is in your hands. The benefit you receive by reading this book is information inside this guide incredible fresh, you will get facts which is getting deeper an individual read a lot of information you will get. This specific Computer Vision Using Local Binary Patterns (Computational Imaging and Vision) without we recognize teach the one who looking at it become critical in pondering and analyzing. Don't always be worry Computer Vision Using Local Binary Patterns (Computational Imaging and Vision) can bring whenever you are and not make your carrier space or bookshelves' become full because you can have it within your lovely laptop even telephone. This Computer Vision Using Local Binary Patterns (Computational Imaging and Vision) having excellent arrangement in word and also layout, so you will not feel uninterested in reading.

Emma Latshaw:

Nowadays reading books become more and more than want or need but also turn into a life style. This reading habit give you lot of advantages. The huge benefits you got of course the knowledge the actual information inside the book in which improve your knowledge and information. The information you get based on what kind of reserve you read, if you want get more knowledge just go with training books but if you want experience happy read one with theme for entertaining including comic or novel. The Computer Vision Using Local Binary Patterns (Computational Imaging and Vision) is kind of book which is giving the reader capricious experience.

Stacey Lawrence:

This book untitled Computer Vision Using Local Binary Patterns (Computational Imaging and Vision) to be one of several books that best seller in this year, honestly, that is because when you read this reserve you can get a lot of benefit in it. You will easily to buy this book in the book shop or you can order it by means of online. The publisher of the book sells the e-book too. It makes you more easily to read this book, as you can read this book in your Cell phone. So there is no reason for your requirements to past this book from your list.

George Privette:

Don't be worry should you be afraid that this book may filled the space in your house, you could have it in e-book method, more simple and reachable. This kind of Computer Vision Using Local Binary Patterns (Computational Imaging and Vision) can give you a lot of pals because by you looking at this one book you have factor that they don't and make a person more like an interesting person. This book can be one of a step for you to get success. This book offer you information that might be your friend doesn't learn, by knowing more than additional make you to be great men and women. So , why hesitate? Let me have Computer
