**Guide to Energy Management, Sixth Edition** Barney L. Capehart Ph.D. CEM, Wayne C. Turner Ph.D. PE CEM, William J. Kennedy Ph.D. PE

Completely revised and edited throughout, this latest edition includes new chapters on creating green buildings and web-based building automation controls along with a comprehensive revision of the chapter on lighting. Written by three of the most respected energy professionals in the industry, this book examines the fundamental objectives of energy management and illustrates techniques and tools proven effective for achieving results. Topics include distributed generation, energy auditing, rate structures, and economic evaluation techniques as well as lighting efficiency improvement, HVAC optimization, combustion and use of industrial wastes, and steam generation and distribution system performance.
