Mind as Motion: Explorations in the Dynamics of Cognition

Mind as Motion: Explorations in the Dynamics of Cognition

Mind as Motion is the first comprehensive presentation of the dynamical approach to cognition. It contains a representative sampling of original, current research on topics such as perception, motor control, speech and language, decision making, and development. Included are chapters by pioneers of the approach, as well as others applying the tools of dynamics to a wide range of new problems. Throughout, particular attention is paid to the philosophical foundations of this radical new research program.

Cognitive science has traditionally been dominated by an AI-based computational paradigm in which cognition is taken to be the manipulation of internal symbols. Even as the potential of this paradigm continues to be explored, limitations are becoming increasingly apparent. Researchers throughout cognitive science have been casting around for alternative theoretical frameworks. Out of this flux has emerged the dynamical concept, according to which cognitive processes are the behavior of nonlinear dynamical systems and are best studied using the mathematics of dynamical modeling and dynamical systems theory.

Mind as Motion provides a conceptual and historical overview of the dynamical approach, a tutorial introduction to dynamics for cognitive scientists, and a glossary covering the most frequently used terms. Each chapter includes an introduction by the editors, outlining its main ideas and placing it in context, and a guide to further reading.

Contributors: Randall Beer, Geoffrey Bingham, Catherine Browman, Jerome Busemeyer, Claudia Carello, Fred Cummins, Jeffrey Elman, Marco Giunti, Louis Goldstein, Stephen Grossberg, Devin McAuley, Mary Ann Metzger, Alec Norton, Jean Petitot, Robert Port, Dana Redington, Steven Reidbord, Elliot Saltzman, Esther Thelen, James Townsend, Michael Turvey, Paul van Geert, Timothy van Gelder

From reader reviews:

Janet Speer:

Do you have favorite book? In case you have, what is your favorite's book? Publication is very important thing for us to be aware of everything in the world. Each guide has different aim or goal; it means that guide has different type. Some people feel enjoy to spend their time and energy to read a book. They may be reading whatever they have because their hobby is actually reading a book. Why not the person who don't like reading a book? Sometime, man or woman feel need book if they found difficult problem as well as exercise. Well, probably you will need this Mind as Motion: Explorations in the Dynamics of Cognition.

Donna Beckman:

What do you about book? It is not important along? Or just adding material when you want something to explain what your own problem? How about your free time? Or are you busy man? If you don't have spare time to perform others business, it is make one feel bored faster. And you have spare time? What did you do? All people has many questions above. They have to answer that question due to the fact just their can do in which. It said that about reserve. Book is familiar on every person. Yes, it is correct. Because start from on guardería until university need this Mind as Motion: Explorations in the Dynamics of Cognition to read.

Melissa Becker:

Reading a guide tends to be new life style in this particular era globalization. With looking at you can get a lot of information that may give you benefit in your life. Together with book everyone in this world can share their idea. Books can also inspire a lot of people. A lot of author can inspire their own reader with their story or their experience. Not only the storyplot that share in the ebooks. But also they write about the information about something that you need illustration. How to get the good score toefl, or how to teach children, there are many kinds of book which exist now. The authors on earth always try to improve their skill in writing, they also doing some analysis before they write for their book. One of them is this Mind as Motion: Explorations in the Dynamics of Cognition.

Bernice Cofield:

As we know that book is very important thing to add our knowledge for everything. By a e-book we can know everything you want. A book is a set of written, printed, illustrated or maybe blank sheet. Every year has been exactly added. This publication Mind as Motion: Explorations in the Dynamics of Cognition was filled concerning science. Spend your spare time to add your knowledge about your scientific research competence. Some people has diverse feel when they reading a book. If you know how big benefit from a book, you can really feel enjoy to read a book. In the modern era like right now, many ways to get book that you simply wanted.
