## **An Introduction to the Event-Related Potential Technique** Steven J. Luck

The event-related potential (ERP) technique, in which neural responses to specific events are extracted from the EEG, provides a powerful noninvasive tool for exploring the human brain. This volume describes practical methods for ERP research along with the underlying theoretical rationale. It offers researchers and students an essential guide to designing, conducting, and analyzing ERP experiments. This second edition has been completely updated, with additional material, new chapters, and more accessible explanations. Freely available supplementary material, including several online-only chapters, offer expanded or advanced treatment of selected topics. The first half of the book presents essential background information, describing the origins of ERPs, the nature of ERP components, and the design of ERP experiments. The second half of the book offers a detailed treatment of the main steps involved in conducting ERP experiments, covering such topics as recording the EEG, filtering the EEG and ERP waveforms, and quantifying amplitudes and latencies. Throughout, the emphasis is on rigorous experimental design and relatively simple analyses. New material in the second edition includes entire chapters devoted to components, artifacts, measuring amplitudes and latencies, and statistical analysis; updated coverage of recording technologies; concrete examples of experimental design; and many more figures. Online chapters cover such topics as overlap, localization, writing and reviewing ERP papers, and setting up and running an ERP lab.

### **From reader reviews:**

#### **Julian Loreda:**

This An Introduction to the Event-Related Potential Technique is great guide for you because the content which is full of information for you who else always deal with world and still have to make decision every minute. That book reveal it details accurately using great arrange word or we can say no rambling sentences in it. So if you are read the item hurriedly you can have whole information in it. Doesn't mean it only provides you with straight forward sentences but tricky core information with wonderful delivering sentences. Having An Introduction to the Event-Related Potential Technique in your hand like keeping the world in your arm, facts in it is not ridiculous just one. We can say that no reserve that offer you world in ten or fifteen minute right but this reserve already do that. So , it is good reading book. Hi Mr. and Mrs. stressful do you still doubt that will?

#### **Dana Vinson:**

As we know that book is essential thing to add our expertise for everything. By a e-book we can know everything we want. A book is a range of written, printed, illustrated or even blank sheet. Every year seemed to be exactly added. This reserve An Introduction to the Event-Related Potential Technique was filled in relation to science. Spend your extra time to add your knowledge about your technology competence. Some people has various feel when they reading a new book. If you know how big good thing about a book, you can sense enjoy to read a book. In the modern era like right now, many ways to get book which you wanted.

#### **Michael Marchant:**

Do you like reading a book? Confuse to looking for your best book? Or your book has been rare? Why so many question for the book? But any kind of people feel that they enjoy regarding reading. Some people likes looking at, not only science book and also novel and An Introduction to the Event-Related Potential Technique or even others sources were given expertise for you. After you know how the great a book, you feel would like to read more and more. Science publication was created for teacher or even students especially. Those ebooks are helping them to add their knowledge. In various other case, beside science e-book, any other book likes An Introduction to the Event-Related Potential Technique to make your spare time a lot more colorful. Many types of book like this one.

#### **Earl Parker:**

Reading a e-book make you to get more knowledge from that. You can take knowledge and information from the book. Book is published or printed or highlighted from each source that will filled update of news. In this modern era like today, many ways to get information are available for a person. From media social including newspaper, magazines, science book, encyclopedia, reference book, story and comic. You can add your knowledge by that book. Are you hip to spend your spare time to spread out your book? Or just looking for the An Introduction to the Event-Related Potential Technique when you needed it?
