Key Ideas in Teaching Mathematics: Research-based guidance for ages 9-19 Anne Watson, Keith Jones, Dave Pratt

Big ideas in the mathematics curriculum for older school students, especially those that are hard to learn and hard to teach, are covered in this book. It will be a first port of call for research about teaching big ideas for students from 9-19 and also has implications for a wider range of students. These are the ideas that really matter, that students get stuck on, and that can be obstacles to future learning. It shows how students learn, why they sometimes get things wrong, and the strengths and pitfalls of various teaching approaches. Contemporary high-profile topics like modelling are included. The authors are experienced teachers, researchers and mathematics educators, and many teachers and researchers have been involved in the thinking behind this book, funded by the Nuffield Foundation. An associated website, hosted by the Nuffield Foundation, summarises the key messages in the book and connects them to examples of classroom tasks that address important learning issues about particular mathematical ideas.

From reader reviews:

Donald Jackson:

As people who live in the modest era should be upgrade about what going on or details even knowledge to make these people keep up with the era that is certainly always change and move forward. Some of you maybe can update themselves by looking at books. It is a good choice for yourself but the problems coming to anyone is you don't know what kind you should start with. This Key Ideas in Teaching Mathematics: Research-based guidance for ages 9-19 is our recommendation to cause you to keep up with the world. Why, as this book serves what you want and wish in this era.

Mitchell Peed:

Now a day individuals who Living in the era everywhere everything reachable by match the internet and the resources inside can be true or not involve people to be aware of each details they get. How many people to be smart in obtaining any information nowadays? Of course the answer then is reading a book. Studying a book can help folks out of this uncertainty Information mainly this Key Ideas in Teaching Mathematics: Research-based guidance for ages 9-19 book since this book offers you rich details and knowledge. Of course the information in this book hundred per-cent guarantees there is no doubt in it as you know.

Antoine Anderson:

Reading can called thoughts hangout, why? Because when you are reading a book especially book entitled Key Ideas in Teaching Mathematics: Research-based guidance for ages 9-19 your head will drift away trough every dimension, wandering in each aspect that maybe not known for but surely might be your mind friends. Imaging each and every word written in a publication then become one application form conclusion and explanation which maybe you never get just before. The Key Ideas in Teaching Mathematics: Research-based guidance for ages 9-19 giving you yet another experience more than blown away your head but also giving you useful info for your better life with this era. So now let us teach you the relaxing pattern is your body and mind is going to be pleased when you are finished studying it, like winning a game. Do you want to try this extraordinary shelling out spare time activity?

Diana Gum:

Many people spending their period by playing outside together with friends, fun activity with family or just watching TV all day long. You can have new activity to spend your whole day by studying a book. Ugh, do you consider reading a book will surely hard because you have to take the book everywhere? It okay you can have the e-book, taking everywhere you want in your Smart phone. Like Key Ideas in Teaching Mathematics: Research-based guidance for ages 9-19 which is having the e-book version. So , try out this book? Let's observe.
