Number Systems and the Foundations of Analysis (Dover Books on Mathematics)

Elliott Mendelson, Mathematics

Number Systems and the Foundations of Analysis (Dover Books on Mathematics) Elliott Mendelson, Mathematics

This study of basic number systems explores natural numbers, integers, rational numbers, real numbers, and complex numbers. Written by a noted expert on logic and set theory, it assumes no background in abstract mathematical thought. Undergraduates and beginning graduate students will find this treatment an ideal introduction to number systems, particularly in terms of its detailed proofs.

Starting with the basic facts and notions of logic and set theory, the text offers an axiomatic presentation of the simplest structure, the system of natural numbers. It proceeds, by set-theoretic methods, to an examination of integers that covers rings and integral domains, ordered integral domains, and natural numbers and integers of an integral domain. A look at rational numbers and ordered fields follows, along with a survey of the real number system that includes considerations of least upper bounds and greatest lower bounds, convergent and Cauchy sequences, and elementary topology. Numerous exercises and several helpful appendixes supplement the text.

From reader reviews:

Mike Greene:

Why don't make it to be your habit? Right now, try to prepare your time to do the important action, like looking for your favorite book and reading a guide. Beside you can solve your trouble; you can add your knowledge by the guide entitled Number Systems and the Foundations of Analysis (Dover Books on Mathematics). Try to make the book Number Systems and the Foundations of Analysis (Dover Books on Mathematics) as your friend. It means that it can for being your friend when you feel alone and beside regarding course make you smarter than ever. Yeah, it is very fortunated for you personally. The book makes you much more confidence because you can know almost everything by the book. So , we need to make new experience in addition to knowledge with this book.

Dean Rakestraw:

The publication untitled Number Systems and the Foundations of Analysis (Dover Books on Mathematics) is the book that recommended to you to see. You can see the quality of the guide content that will be shown to an individual. The language that article author use to explained their ideas are easily to understand. The article author was did a lot of analysis when write the book, hence the information that they share to you is absolutely accurate. You also might get the e-book of Number Systems and the Foundations of Analysis (Dover Books on Mathematics) from the publisher to make you much more enjoy free time.

Sherry Clark:

A lot of people always spent their very own free time to vacation or even go to the outside with them family or their friend. Do you realize? Many a lot of people spent they will free time just watching TV, or maybe playing video games all day long. In order to try to find a new activity that is look different you can read a new book. It is really fun for yourself. If you enjoy the book that you simply read you can spent all day every day to reading a publication. The book Number Systems and the Foundations of Analysis (Dover Books on Mathematics) it is very good to read. There are a lot of individuals who recommended this book. We were holding enjoying reading this book. When you did not have enough space bringing this book you can buy typically the e-book. You can m0ore very easily to read this book from a smart phone. The price is not too costly but this book provides high quality.

Mary Abrams:

What is your hobby? Have you heard in which question when you got scholars? We believe that that query was given by teacher to the students. Many kinds of hobby, Every individual has different hobby. And you also know that little person like reading or as reading through become their hobby. You need to know that reading is very important along with book as to be the point. Book is important thing to include you knowledge, except your personal teacher or lecturer. You discover good news or update in relation to something by book. Different categories of books that can you go onto be your object. One of them are these
